DEPARTMENT OF ELECTRICAL ENGINEERING

LETTER OF RECOMMENDATION FOR MR SOUMODEEP KARMAKAR

It is my pleasure to recommend Mr. Soumodeep Karmakar who is presently a student of undergraduate studies in Electrical Engineering Department of Jadavpur University at a level of second year second semester. I know him for last one and half years.

I had the opportunity to teach Soumodeep on *Signals and Systems* and *Digital Signal Processing* as theory papers, and *Circuit Laboratory*. In this connection, I had close interactions with him when he impressed me very much in respect of academic status of other students I met during the last twenty-five years of my experience as a teaching faculty member in the Electrical Engineering Department of Jadavpur University.

He impressed me with his sharp and analytical mind. He is hard working and well mannered, has the capability to work incessantly on his assignments to yield fruitful outcome. He always participates actively in the discussions on various subjects and topics. I remember him, as an undergraduate student, consulting me time and again with queries regarding various aspects of the subjects he is studying.

I have no hesitation in placing Mr. Soumodeep Karmakar among the top 15% of those who have pursued coursework up to his present level in this department over the last ten years. His qualities are clearly indicative of his potential. He is an ambitious person with a desire to set a mark in his career. I feel that he will be a tremendous asset for the organization he is going to serve.

Therefore, I strongly recommend him for the program of your Organization, and also for any financial award that may be available.

Biswajit Bhattacharyya
Associate Professor
Electrical Engineering Department
Jadavpur University

Kolkata.
